

1. CLAIM AMENDMENTS

Please amend the claims as following:

1. I. - (currently amended) A printed matter embodying a microelectronic device
embodied into a printed matter and that is capable of reproducing sounds from a
memory integrated circuit, said microelectronic device further comprising of:

(a) a memory device for storing data;

(b) a printed matter, an activatable trigger mechanism to switch the
microelectronic device on; and

(c) a micro power supply that feeds energy to operate said microelectronic
device.

II.2. (currently amended) The Said printed matter ~~microelectronic device referred to~~
~~in~~ of Claim 1I ~~where the printed matter may further~~ being a book.

III.3. (currently amended) The Said printed matter ~~device referred to in~~ of Claim 1I
~~where the printed matter may be further being~~ a magazine.

IV.4. (currently amended) The printed matter ~~Said device referred to in~~ of Claim 1I
wherein the sounds are emitted in audible tones by activating a the trigger
mechanism.:-

~~V5.~~ (currently amended) The printed matter ~~Said mechanism referred to in~~ of Claim 1IV ~~wherein may be the triggered mechanisms is activated~~ by opening of the printed matter.

~~VI.6.~~ (currently amended) The printed matter of ~~Said mechanism referred to in~~ Claim 1IV ~~wherein may be the triggered mechanism is activated~~ by the use of an off-on switch.

a1 ~~VII.7.~~ (currently amended) The printed matter ~~Said device referred to in~~ of Claim 1I wherein activation of the trigger mechanism reproduces sounds ~~may be~~ a message emitted by a human voice.

~~VIII.8.~~ (currently amended) The printed matter ~~Said device referred to in~~ of Claim 1I wherein activation of the trigger mechanism reproduces ~~the sounds may be~~ a message of music.

~~9.IX.~~ (currently amended) The printed matter ~~Said device referred to in~~ of Claim 1I wherein activation of the trigger mechanism reproduces ~~the sounds may be~~ a combination of human voice as speech and music.

~~10.X.~~ (currently amended) The printed matter of ~~sounds referred to in~~ Claim 1VII wherein the sounds reproduced may vary in length.

~~XI.11.~~ (currently amended) The printed matter of ~~sounds referred to in~~ Claim 1~~VH~~
wherein the sounds reproduced may vary in complexity.

~~XII.12.~~ (currently amended) The printed matter of ~~sounds referred to in~~ Claim 1~~VH~~
wherein the sounds reproduced may be a single message.

~~XIII.13.~~ (currently amended) The printed matter ~~sounds referred to in~~ of Claim 1~~VH~~
wherein the sounds reproduced may be various messages.

~~XIV.14.~~ (currently amended) The printed matter ~~sounds referred to in~~ of Claim VH1
wherein the sounds reproduced may be emitted by activating certain indicators in the
printed matter.

~~XV.15.~~ (currently amended) The printed matter ~~indicators referred to in~~ of Claim
1~~XIV~~ wherein the trigger mechanism is activatable by ~~may be~~ the opening of
different parts of the printed matter.

~~XVI.16.~~ (currently amended) The printed matter ~~An indicator referred to in~~ of Claim
1~~XIV~~ wherein the trigger mechanism is activatable by ~~may be~~ pressing an area of the
printed matter.

~~XVII.17.~~ (currently amended) The printed matter of ~~An indicator referred to in Claim 1-XIV wherein the trigger mechanism is activatable -may be~~ by physical contact with the printed matter.

~~XVIII.18.~~ (currently amended) The printed matter of ~~The memory device referred in Claim 1 wherein the memory device is an~~ ~~I may be an~~ integrated circuit.

a' ~~XIX.19.~~ (currently amended) The printed matter of ~~The memory device referred to in Claim 1 wherein the memory device -may allows~~ the reader to customize his or her own message.

~~XX.20.~~ (currently amended) The printed matter of ~~The memory device referred to in Claim 1 wherein the memory device #~~ indicates to the reader at what point he or she stopped reading the printed matter.

~~XXI.21.~~ (currently amended) The printed matter ~~memory device referred to in of Claim 1 wherein the memory device #~~ indicates to the reader at what point he or she stopped reviewing the printed matter.

~~XXII.22.~~ (currently amended) The printed matter of ~~microelectronic device referred to in Claim 1 wherein such~~ microelectronic device is fixed in the inner edge of the spine of the printed matter.

~~XXIII.23.~~ (currently amended) The printed matter ~~microelectronic device~~ referred to in of Claim 11 wherein the microelectronic ~~such~~ device is fixed in the inner edge of the cover of the printed matter.

a!

XXIV.24. (currently amended) The printed matter ~~microelectronic device~~ referred to in of Claim I wherein the microelectronic device ~~it~~ is placed or sandwiched in between pages of the printed matter.
